ACTION PLAN

"My further steps into employment in the digital sector"

The **Action plan** "My further steps into employment in digital sector" will help you to plan your steps to start further learning in order to get employment in the digital sector.

The main aim of this Action plan is to motivate you to **become responsible for creating your own learning path**, planning and placing the actions you want to develop.

During the development of the individual action plan you are encouraged to use the information from Digital success stories "Successful women in digital sector of labour market" and Interactive readings "ABC on gender equality in the labour market".

You will be also supported by coach in defining your action plan, including the selection of the re-qualification training courses needed and possible for you personally. The Compendium of (re-)training programs for qualifications in digital sector of labour market serves as an information resource for selecting the training course.

Increasing adult educators' competencies to encourage female employment in the digital sector of the labour market
Project No. 2019-1-LT01-KA204-060723

Co-funded by the
Erasmus+ Programme
